About This Content

The 'Hyperspace Dogfights Original Game Soundtrack / Steam Edition' is a musical journey into a parallel universe, a journey from intergalactic megacities through marvellous as well as dark and filthy environments to the edge of known space. On this journey you'll encounter various lifeforms. Some exist on the earliest levels of evolution, some are singular experiments of nature, some succeeded in overcoming their genetic evolution resulting into artificial intelligence. There is peace and there is war and aggression. There is greed and dignity. And it's all translated into sound and music.

The 'Hyperspace Dogfights Original Game Soundtrack / Steam Edition' contains 26 tracks from Leipzig based Electronica artist and composer ENUIT (Enrico Stenzel), including 12 exclusive tracks originally used in the games battle-modes - only available through the 'Hyperspace Dogfights' Soundtrack - 'Steam Edition'!

The main theme "Ambitious Decampment" was created in a collaboration of ENUIT with Isle Of Sound (Ole Toense),- another Leipzig based musician and composer.

Track List:

- 01 Ambitious Decampment
- 02 Launchpad
- 03 Hyper-Matrix
