ROBLOX is a company characterized by its community-based culture. This is reflected in its games, which are generally hosted on the website (as opposed to the product), and as a result, are built by users for users. The developers at ROBLOX have stated that they are completely open to third party development—the only restriction on what is considered acceptable and permissible is that all products must be compatible with ROBLOX's Terms of Service. Whether ROBLOX soft products will be accepted into the Steam platform is still unconfirmed.

Roblox users sometimes experience glitches that can let them bypass the moderation system. For example, if a moderator sends you a message and you reply right after they ban you, it will say that your message could not be delivered because they are moderating (unless you previously muted or blocked the user).

ROBLOX has also been criticised for lacking any kind of quality assurance for its games. There have been many issues with the quality of some games and many users have complained that their game descriptions are not accurate. The site is also frustratingly inconsistent in the manner it deals with things like this, often banning users who complain about bugs and glitches within their games but not actually banning anyone who commits an illegal act, such as copying someone else's game and selling it without permission.
